
Lin Engineering Acquires RMS Technologies

Morgan Hill, California – February 24, 2015 – Lin Engineering announced that it has acquired the motion control division of RMS Technologies.

Founded in 2000, RMS Technologies designs and manufactures drivers and controllers for stepper and BLDC motors. Following the acquisition, all design and manufacturing of these products will be transferred to Lin Engineering’s facility in Morgan Hill, California.

Lin Engineering will continue building on the existing product base with continued expansion in both open loop and closed loop functionality.

About Lin Engineering

Founded by Ted T. Lin in 1987, Lin Engineering began as a consulting company specializing in stepper motor applications. Throughout its history, Lin Engineering has continued to develop its capabilities in the areas of design engineering, manufacturing, and customer service. Today, Lin Engineering has manufacturing facilities in Morgan Hill, California and Nanjing, China. More information is available at www.linengineering.com
